

Sale Name: Spring Equipment & Vehicle Consignment Auction

LOT 56P - Water Trailer - 1000 gallon

Description

Homemade trailer. No title. Well built. 2 axles with 6 bolt hubs and 9.5L-15 tires. Tires are in good condition. Trailer has a storage rack on the front and cover for gas powered pump on the back corner. Condition of the pump is unknown. It has been sitting in the shed for a few years and the seller needs the space for other items. The tank is a 1000 gallon galvanized tank. It did not leak the last time it was used. The baffle broke loose. This was used for hauling water for spraying in the summer. This would make a great spraying water trailer, stock water trailer, or take the tank off and have a good little trailer with little modifications. Seller: Mike Seibel Reason Selling: Don't need it. No Reserve

Quantity: 1
